PROJECT AREA/TOOLS

Tools Required:

JAVA NETBEANS (8.2), ORACLE SQL

SUMMARY OF PROPOSED PROJECT

FUNCTIONALITY:

1. Super Admin User:

Super Admin User will give access to other users as well as can create the tables, view tables, can insert data, delete data etc.

2. Mid Level User:

Mid Level User can only view his table, update table and insert into table.

3. End User:

End User can only order through interface.

SCOPE:

- In our Glass Cutting Project where customers can easily order their product and the database will be maintained.
- The main functionality of our project is to retrieve and store data of the customer and their order.
- We will generate Bill of the customer and issue the delivery date and status.
- Our interface will be user friendly, so that the customer can easily access.
- We will maintain the Vendors Record, Customers Inquiry Record and manage our Sales annually and monthly as well as daily.
- We will use JOINS and TRIGGERS for managing our database.

ROLES: (Not Confirmed Yet)

- Maaz Sabahuddin will work on connectivity between NETBEANS (JAVA) and ORACLE SQL.
- Azka Khan will work as Super Admin and handle Mid Level User.
- Shahrukh Mahmood will work on QUERIES.
- Momal Qadir will work on Mid Level User.
